Torino, 7 January 2000

Dear Elizabeth,

The Scientific Committee and I are pleased to confirm your invitation as guest speaker at the pre-congress courses of the 49th National SICPRE Congress, Turin, 28 October to 1 November 2000.

The form of your presentation will be a lecture to be conducted in the pre-congress course on the topic of "*Mastoplasty Reductive*", scheduled for Saturday, 28 October 2000, and repeated on Sunday, 29 October.

The title of your presentation is "*The Central pedicle breast reduction technique*" and the maximum time allotted for it is 30 minutes. You are welcome to include video material formatted in the VHS PAL system (max. 15 min.). If you are planning to use didactic materials (hand outs of summaries, diagrams, tables, etc.), please send them to our office by 6 October 2000 so we can have them photocopied and ready for distribution to the course participants on the days of your presentation.

In addition, please send us either by fax (+39 011 2446900) or e-mail (cci@fileita.it) a list of at least 5 multiple choice questions which will be compiled with those of the other instructors to make up the final exam of the course. To do this, we must receive your list no later than 13 October 2000.
